SAM RIMELL

PRIMARY EXAMINER

Art Unit: 2175

Preliminary Note: Applicant's Information Disclosure Statement of May 13, 2002 has been received and fully considered.

Claims 2-6, 8-12, 14-19, 21-24, 27-32, 35-39 and 41-45 are objected to under 37 CFR 1.75 (c) as being of improper dependent form for failing to further limit the subject matter of a previous claim.

The reasons for this objection are set forth in the office action of January 2, 2002 and are hereby incorporated by reference.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Whitney et al. ('834).

The reasons for this rejection were set forth in the office action of January 2, 2002 and are hereby incorporated by reference. It is further noted with respect to claims 1, 7, 13, 20, 26

Art Unit: 2175

and 34, Whitney et al. discloses a printer (19) capable of printing representations upon a medium.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States.

Claims 40-45 are rejected under 35 U.S.C. 102(d) as being anticipated by Herbert ('592).

The reasons for this rejection were set forth in the office action of January 2, 2002 and are hereby incorporated by reference.

Remarks

Applicant's arguments have been considered but are not well taken.

As stated in the previous office action, Examiner does not find the case of *In re Gulack* as being supportive of applicant's assertions of patentability. The case of *In re Gulack* considered the question of whether or not patentable weight could be attributed to printed matter which was printed upon jewelry. Both the jewelry and the printed matter itself were positively recited in the claims as being part of the invention and the question at law was whether or not the printed matter could be attributed patentable weight.

In the present application, we do not have the same set of circumstances. The claims of the present invention recite the printed matter as a desired output of the apparatus, not an actual physical part of the apparatus. This is a critical distinction from *Gulack*, where the printed matter was physically part of the invention. In the present case, the printed matter is not physically part of the invention, it is only a desired result of the invention.

Art Unit: 2175

Accordingly, the teachings that derive from the *Gulack* case are not useful in establishing patentability for the present set of claims. Furthermore, applicant's amendments reciting the presence of a printer do not change the fact that the *Gulack* case is not relevant to the issues raised in the present application. The recitation of a printer does not change the fact that the output print is not physically part of the apparatus.

This office action is not made final.
